

## DYNAMIC FUSION SYSTEM FUNCTIONING

The HD vocal loudspeaker (12-inch DFS-912 or 15-inch DFS-915) functions separately with the bass powered subwoofer (12-inch DFS-112 SUB or 18-inch DFS-118 SUB). Therefore, it produces superior live sound quality. Please refer to the following diagram for connection.

**NOTE** There are two kinds of subwoofer: active/powerd subwoofer and passive/non-powered subwoofer. For powered subwoofer, you need connecting it to mixer. For non-powered subwoofer, you need a power amplifier to operate it. For high power output, you need a high power amplifier. Please consult with our authorized dealers for the technical aspects in details.

This HD Vocal Loudspeaker connection panel are all the same in these models: DFS-912 and DFS-915.
